

Accelerating Medical Innovation to Enhance Patient Wellbeing

PBC BioMed was founded in 2010 to drive innovation in medical devices, biomaterials and pharmaceuticals by helping clients accelerate the commercialization of ideas. Our extensive industry expertise has made us the trusted strategic partner for small to large companies, physicians, universities and government-funded projects to advance the development of life-changing medical technologies.

Management Tool **AIM**

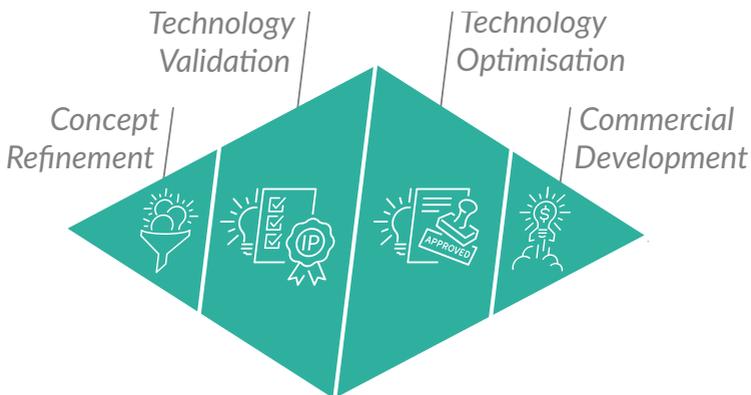

Accelerating Medical Innovation-**AIM**

Our Innovation Management Tool 'AIM'

allows us to partner with clients on taking an idea from concept to commercialisation quickly, while de-risking potential roadblocks along the pathway to success.

Whether you need a partner for a specific step or the entire journey, we can help.

Our Commitment

Every partnership is tailored to your needs,
from full-service product development,
to targeted support of a specific function.

AIM Services

Research
Development
Regulatory
Quality Management
Technology Transfer
Contract Manufacturing
Clinical
Distribution
Commercialisation

How can PBC Biomed help you?

Innovation

Do you have an idea that could improve patient's lives, but need a partner to bring it to market?

PBC BioMed partners with medical device, biologic, pharmaceutical and combination product innovators in supporting their products through the product lifecycle stages. We have developed a deep understanding of the regulatory, quality, clinical and business requirements facing innovators already based in the EU or companies wishing to enter the EU marketplace.

Consultancy

Are you in medtech and need consulting support to hit timelines and budget?

PBC BioMed can help. Many healthcare companies are choosing to outsource their regulatory affairs and quality assurance requirements, to ensure compliance and to accelerate implementation in today's fast changing and increasingly complex regulatory environment.

Manufacturing

Are you looking for a contract manufacturer?

PBC BioMed support the design, development and validation of medical device, biologic and combination products by leveraging its in-depth design, development and manufacturing knowledge and technical capabilities to achieve regulatory and compliance.
